About Me

25 years old, living in Bourg-en-Bresse, France. I'm an active person who enjoys running, cycling, and skiing in my free time. In addition, I love meeting new people and cultures, as well as learning new things.

Languages

Danish: Native
English: Advanced
French: Intermediate
Italian: Basic

Personal Skill

- Diligent and persistent
- Detail-oriented
- Responsible and self-disciplined
- Reliable
- Quick to learn
- Passionate
- Independent and well-organized

Profile

I am a former professional cyclist who has lived in both Italy and France, but I have now chosen a new direction and am currently studying Computer Science online. Through my studies I have developed skills in C#, SQL, HTML & CSS, DevOps, networking, cloud computing, and project management. My interest in IT began in high school with Arduino projects and simple programs in HTML and later Python. Since then, my fascination with the possibilities of IT and its constant evolution has driven me forward.

Outside of my studies, I enjoy being active in nature through cycling, running, and skiing. I also like to travel to experience new places and cultures, but I equally value relaxing with a good book or spending time with friends over food, drinks, or board games.

Experience

Mar 2025 - Present

Study Assistant
Alongside my own studies, I'm part of an online study café for other Computer Science students, where I provide help with technical subjects and strengthen my own communication skills.

Jan 2019 - Dec 2024

Cycling
After high school, I moved to Verona in Italy and later to Bourg-en-Bresse in France to pursue a career as a professional cyclist. This experience gave me strong soft skills such as goal orientation, time management, independence, and the ability to quickly integrate into international teams.

Education

Feb 2024 - Graduation June 2026

Online Computer Science Program
In 2024, I began the online Computer Science program at UCL in Odense (Denmark) while completing my final season as a professional cyclist. The online format has suited me well, as it allows me to plan my own schedule and choose where I work from. The program has also placed a strong emphasis on independent work.

Aug 2016 - June 2019

Higher Technical Education (HTX)
I completed the Higher Technical Examination Programme (HTX) at TEC in Ballerup (Denmark), with Mathematics, Physics, Biotechnology and Danish at A-level.

Skills & Tech Stack

- **Programming Languages & Scripts:** C#, SQL, Python, HTML/CSS, XAML
- **Frameworks & Libraries:** .NET, Blazor, WPF, Bootstrap
- **Databases & Data Management:** MSSQL, PostgreSQL, SQLite, Redis
- **Design Patterns & Principles:** SOLID, GRASP, MVC, MVVM, Clean Architecture
- **IDEs & Versioning:** Visual Studio 2022, Rider, Neovim, Git, GitHub
- **DevOps & Infrastructure:** CI/CD (GitHub Actions), containerization (Docker, LXC), Linux, virtualization, Kubernetes, Terraform, Azure
- **Security:** HashiCorp Vault, Zero Trust, RBAC, GDPR, Monitoring (Loki, Jaeger, Prometheus, Grafana, OpenTelemetry)
- **Tools & Platforms:** Fedora & Windows, AI (for debugging, coding & idea generation), Kanban/Scrum/Gantt, UML
